DELUMPWITT

FLEXIBLE, COMPACT, PERFORMING

In a single step, the DelumpWitt mills bulk goods that have hardened and formed lumps as large as 60 cm over time to finenesses of up to 250 µm.

Hard products and lumps as large as 60 cm are reduced to a fine-flowing powder in a single step. Its construction guarantees significant advantages and it can be used as a stand-alone unit for batch production or for continuous operation. The DelumpWitt sets new standards in milling when it comes to modularity, user and maintenance friendliness.

CHARACTERISTICS OF THE DELUMPWITT

- Very broad spectrum of applications ranging from all types of dry to wet and sensitive products
- Optimum production flexibility thanks to the modular design
- The pivoting device allows a simple rotating of the milling head for an easy access for changing the milling tools (rotor/sieve) or cleaning Washing-in-Place (WIP), (Cleaning-in-Place (CIP), Sterilization-in-Place (SIP) available as option)
- Versatile use thanks to a large selection of milling tools (rotor/sieve), which can be easily and quickly changed
- Inlet funnel for blocks up to a size of 60 x 30 x 20 cm (for larger blocks on request)
- Simplification of the production process
- Modular, compact, small foot print
- High production safety thanks to the certified concept (ATEX Zones 0/20 for inside optionally available)

PROCESS DATA

Particle size range	up to 250 µm
Throughput DelumpWitt	up to 11000 kg/h*
Density	up to 2 kg/dm ³
Temperature range product	from -20°C bis +60°C

* The flow rate depends on product characteristics and particle size
